1952-53 SEASON

Kilgore's FLOWER GUIDE for Florida

Spread Happiness Everywhere With Lots of Flowers

Beautiful Lawns Can Be Grown in Florida

In Florida, unlike many other parts of the United States, beautiful flowers and lawns can be grown every month in the year, since the climate and soils are favorable to the production of the finest lawns and flower gardens. Not only does a flower garden and lawn enhance the appearance and attractiveness of a home, it also makes it a much more inviting place to live.

SUGGESTIONS FOR MAKING A FLORIDA FLOWER GARDEN

For further information on growing flowers in Florida write to the Florida Agricultural Experiment Station, Mail-
ing Department, Gainesville, Florida, for a free copy of Florida Agricultural Extension Service Bulletin No. 133,
entitled, "Annual Flowers."

A proper soil condition is absolutely necessary for a good flower garden. The soil must be put in the proper condition or the flower garden will never be satisfactory. It is much easier to make the condition of the soil right at the beginning than to attempt to do the improving as you go along after the flower garden is planted.

In many places, the size of the garden is limited and the soil often very poor. The procedure of improving and preparing the flower garden soil is really quite simple, whether the soil is hard clay or light sand. Well rotted manure and leaf mold or black muck or hammock soil are ideal materials to work into the flower garden soil. If you cannot get well rotted manure and leaf mold or muck or hammock soil, the easiest and cheapest way is to spade under a thick layer, two or three inches deep, of horticultural grade peat moss. This material is clean and easy to handle, and a wonderfully effective material for breaking up hard soil and making it mellow, or for adding humus to sandy soil, making it more retentive of moisture and fertilizer materials. After the first layer of peat moss has been spaded into the ground, again cover the surface with an inch or two of peat moss, or better, Wizard Brand Sheep Manure, and a liberal application of a good garden fertilizer such as Vigoro or Vertagreen, applying it at the rate of about 4 to 6 pounds per 100 square feet. If these materials are raked into the surface soil 7 to 10 days before sowing seed or settling plants, you have the foundation for an excellent flower garden.

There are two general methods of sowing flower seeds, the first method is to sow the seeds in the open in shaded shallow furrows in the garden, where the plants are to bloom. Burlap, palm leaves or Spanish moss may be used for shading, and will also protect seeds from being washed out, covered too deep or packed by heavy rains.

The other and preferred method of starting most flower seedlings in Florida is to sow the seeds in flats or shallow boxes, or in muslin or burlap covered seedbeds, where the environment may be more easily and better controlled, than when sown in the open. The flats must have adequate drainage provided by holes in the bottom to allow the free passage of water.

Larkspur—Giant Imperial Mixture

If flats are used, use a mixture of rotted manure or peat moss and fertile sandy loam garden soil, free of root-knot nematodes, and fill the flat to within a half inch of the top. Firm the soil with a block of wood, and soak with a fine spray. After the water has drained away, sprinkle small seeds thinly over the moist surface, or plant large seeds in rows. Large seeds may be covered by sand; fine seeds planted broadcast, such as Snapdragon, Pansy and Petunia, should be pressed into the soil with a block.

Cover the seeds with newspaper, or better, with burlap, and apply water to the flat or seedbed daily, until germination starts. It is very important never to allow the seeds to dry out. The cover must be removed immediately after the seeds sprout so that the tiny plants will not be weak, spindly or leggy.

After germination, apply a damp-off disease control, such as Semesan, following directions on the package. The damp-off control should be used at the first sign of the disease, which causes young seedlings to rot off at the base of the stem. Give as much light as possible and water daily with a fine spray, never allowing seedbed soil to dry out.

Thin the seedlings as they begin to crowd. When the flower plants have four leaves and are 4 to 6 inches high, they should be set in their permanent locations in moist soil in the garden on a cloudy afternoon or toward evening, and water the plants thoroughly immediately after setting. They should be shaded during the next few days until they become established. Frequent heavy watering toward evening, and bi-monthly applications of a good fertilizer will contribute in a large measure to the success of a flower garden. Frequent shallow cultivation to keep down weeds, and to loosen the surface soil is a very beneficial operation.

After the flower plants are established in the garden, a light mulch of peat moss, oak leaves or partially rotted grass clippings over the entire soil around the plants will preserve moisture, keep the roots cool, and discourage weed growth.

A good complete fertilizer mixture such as Wizard Brand Sheep Manure or Vigoro or Vertagreen, applied lightly every two weeks will make thrifty plants which produce an abundant supply of large attractive flowers throughout the season. It is a good plan to apply the above indicated materials alternately, using different materials for successive applications.

GLADIOLUS BULBS Rainbow Mixed

Enjoy beautiful cut flowers from your own garden. For continuous blooms plant bulbs every 10 days to two weeks. In North and Central Florida plant from August to October, and January to May. In South Florida plant from September to May.

Set bulbs 4 inches deep and 6 inches apart in well-prepared and well-drained beds.

Semi-Double Golden Gleam**

KILGORE'S FLOWER SEEDS FOR FLORIDA

Make Florida More Beautiful With Flowers

The following kinds and varieties are recommended:

PETUNIA. September through June. 2 1/2 3 months.

Rose Morn. 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.35; 1/2 oz. \$2.50; oz. \$4.50.

Heavenly Blue. 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.35; 1/2 oz. \$2.50; oz. \$4.50.

Howard Star Improved. 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.35; 1/2 oz. \$2.50; oz. \$4.50.

Snow Queen. 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.35; 1/2 oz. \$2.50; oz. \$4.50.

Elk's Pride 1/16 oz. \$3.00; 1/8 oz. \$5.50; 1/4 oz. \$10.00

Fire Chief (All-America Selection). 1/16 oz. \$1.75; 1/8 oz. \$3.25; 1/4 oz. \$6.25.

Flaming Velvet (velvet red) 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.35; 1/2 oz. \$2.50; oz. \$4.50.

Superb Mixture. 1/8 oz. 50c; 1/4 oz. 75c; 1/2 oz. \$1.35; oz. \$2.50; 1/4 lb. \$7.50.

Fluffy Ruffles Mixture. 1/16 oz. \$3.00; 1/8 oz. \$5.50; 1/4 oz. \$10.00.

PHLOX, Peninsular Mixture. September through February, 3 months. 1/8 oz. 50c; 1/4 oz. 75c; 1/2 oz. \$1.35; oz. \$2.50; 1/4 lb. \$7.50.

POPPY, CALIFORNIA, Gorgeous Mixed (Single Flowering). September through January. 3 months. Oz. 35c; 1/4 lb. \$1.25.

PORTULACA or SUN PLANT, Double Mixed. February through August. 1 1/2 months. 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.35; 1/2 oz. \$2.50; oz. \$4.50.

QUEEN ANNE'S LACE. September through January. 2 to 3 months. 1/2 oz. 35c; oz. 60c; 1/4 lb. \$2.00.

SALVIA, Bonfire. September through June. 3 to 4 months. 1/16 oz. 60c; 1/8 oz. \$1.00; 1/4 oz. \$1.75; 1/2 oz. \$3.25.

SCABIOSA (Mourning Bride), Sunrise Mixture. September through December. 5 months. 1/4 oz. 35c; 1/2 oz. 60c; oz. \$1.00; 1/4 lb. \$3.00.

SNAPDRAGON. September through December. 3 to 4 months.

Giant Mixture (Rust Resistant). 1/16 oz. 30c; 1/8 oz. 50c; 1/4 oz. 75c; 1/2 oz. \$1.35; oz. \$2.50; 1/4 lb. \$7.50.

Finest Half-tall Mixture (Rust Resistant). 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.25; 1/2 oz. \$2.25; oz. \$4.00; 1/4 lb. \$12.00.

STATICE. September through January. 3 months. Assorted Colors. Oz. 35c; 1/4 lb. \$1.00; lb. \$3.00.

Blue, Rose, Lavender, White or Yellow. 1/2 oz. 30c; oz. 50c; 1/4 lb. \$1.50; lb. \$4.50.

SWEET PEAS—Early Flowering Spencer. September through December. 2 1/2 to 3 months.

Mrs. Herbert Hoover (bright blue).

Mars (bright crimson-red).

Shirley Temple (rich pink).

Hope (pure white).

Lavanda (pure clear lavender).

Ball's Orange Improved (deep orange).

Any of above, oz. 50c; 1/4 lb. \$1.35; 1/2 lb. \$2.50; lb. \$4.50.

Rainbow Mixture. Oz. 35c; 1/4 lb. \$1.00; 1/2 lb. \$1.75; lb. \$3.00.

Red Radiance

White American Beauty

TITHONIA or FLORIDA SUNFLOWER, Orange-Scarlet. February through June. 3 months.

1/8 oz. 50c; 1/4 oz. 75c; 1/2 oz. \$1.35; oz. \$2.50; 1/4 lb. \$7.50.

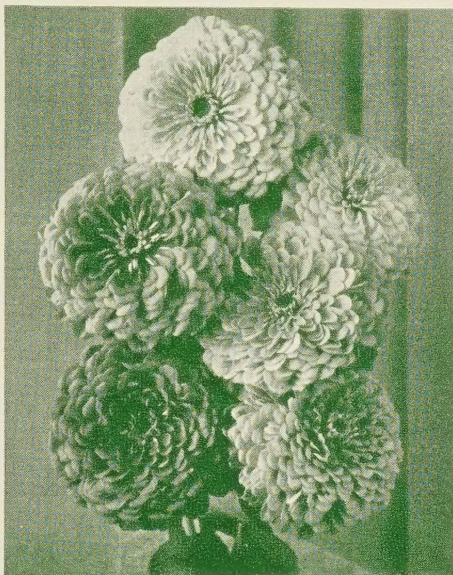

Torch (new dwarf). 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.35; 1/2 oz. \$2.50; oz. \$4.50.

VERBENA, Master Mixture. Any month. 3 months.

1/8 oz. 50c; 1/4 oz. 75c; 1/2 oz. \$1.35; oz. \$2.50; 1/4 lb. \$7.50.

VINCA or PERIWINKLE, Pink and White Mixed. Any month. 3 months.

1/8 oz. 50c; 1/4 oz. 75c; 1/2 oz. \$1.25; 1/2 oz. \$2.25; oz. \$4.00; 1/4 lb. \$12.00.

Zinnia—Sunburst Mixture

ZINNIA. February through August. 1 1/2 months.

Special Crown O'Gold Mixture.

Fantasy Mixture.

Giants of California Special Mixture.

Crimson Monarch.

Wonder Rose.

* "Time to plant" indicated is for central and south Florida. In north Florida, many kinds will not withstand the winter cold, and this fact should be taken into consideration with reference to time of planting. † For bedding, give ½ space indicated between rows.

YOUR PEST CONTROL PROBLEMS AND THEIR SOLUTION

It cannot be denied that flowers, shrubs and palms won't stay healthy and beautiful unless we constantly battle insects, diseases and other pests. This is particularly true in Florida, where, in addition to the presence of many pests common in other parts of the country, we have to contend with tropical and sub-tropical insects and diseases.

Unfortunately, many of these pests, particularly in the case of diseases, have not been sufficiently studied and described to permit us to choose efficient and safe control measures in all cases. Nevertheless, an attempt has been made in the preparation

of the following table to include the more common pests as well as their host plants without giving detailed descriptions, but rather emphasize practical control measures. In most cases, insects are named by groups, such as scales, mealy bugs, thrips, aphids, caterpillars, etc., except where it is important to name some individuals more specifically.

To avoid a great deal of duplication in the table itself, footnotes are provided covering cautions to be observed when using certain recommended materials, especially those containing oil emulsions. Please read them carefully.

GENERAL INFORMATION

When dusting or spraying, cover all infested portions of plants thoroughly, particularly the under sides of leaves. Do not dust or spray when windy, as you cannot expect good coverage. When spraying, be sure that foliage is dry.

Oil sprays can be injurious to some ornamental plants under certain conditions. Use them carefully in accordance

with directions on labels. When using oil sprays, they should be applied with as much pressure as possible.

The use of soil fumigants for root-knot control, such as Soilfume Caps, is not advisable in established plantings, as valuable plants in the vicinity of treatment may be severely damaged or killed. Follow label directions closely.

PESTICIDES

Prices quoted are FOB Plant City or Kilgore Stores. All prices are subject to change without notice. All Insecticides, Fungicides, Fertilizers, Garden and Lawn Tools or any supplies

not used for Commercial Agricultural purposes are subject to 3% Florida State Sales Tax. Rate of sales tax—10c no tax; 11 to 35c — 1c tax; 36 to 65c — 2c tax; 66 to \$1.00 — 3c tax.

BLACK LEAF 40

For the control of aphids, thrips, leafhoppers, and other soft bodied sucking insects. BLACK LEAF 40 is ineffective in cold weather and should only be applied when the temperature is about 75° or higher. Use two tablespoons per gallon of water. 1 oz. 35c; 5 oz. \$1.05; 1 lb. \$2.40; 2 lbs. \$4.15

BUG-GETA PELLETS

BUG-GETA PELLETS provide an easy way to kill snails and slugs.

12 oz. 50c; 2 lbs. \$1.00; 5 lbs. \$2.00

DITHANE Z-78

A synthetic fungicide which is specific for the control of petal blight in azaleas. Applications should begin when reddish fruiting bodies of the fungus appear on the ground. This treatment should be continued three times a week for a period of three weeks. Spray should be directed into centers of the flowers. Use two tablespoons per gallon of water or one pound per 50 gallons.

3-lb. bag \$2.52

ISOTOX GARDEN SPRAY

An especially effective spray containing five per cent lindane for control of chewing and sucking insects usually found on ornamentals as indicated in the preceding table. This spray is marked by the absence of odor and visible residue. Use four tablespoons per gallon of water.

4-oz. bottle \$1.00; 8 oz. \$1.70;
16 oz. \$2.95

KILCOP-"53"

(Contains 53% metallic copper).

KILCOP is extremely fine. This fineness is essential for good coverage of a copper compound for effective control of fungus diseases. Use 2½ tablespoons per gallon or two pounds per 50 gallons of water.

6 lbs. \$1.79

KILGORE'S LAWN DUST

As the name implies, this entirely new dust has been designed to control most of the insects usually infesting various types of lawns, such as chinch bugs, army worms, sod webworms, ants, etc. KILGORE'S LAWN DUST is somewhat similar in composition to KILGORE'S SHRUB DUST, but it should not be used for any other purpose except lawn applications. Kilgore Lawn Dust is not as toxic to humans and warm-blooded animals as most other dusts used for chinch bug control at the present time. For chinch bug control the material should be applied at the rate of from three to four pounds per 100 sq. ft. For the control of sod webworms, army worms and ants, roughly one-tenth of the amount recommended for chinch bugs should produce sufficient coverage. If desirable, individual anthills can be treated with KILGORE'S LAWN DUST by covering each hill with a small handful of the dust. For further detailed directions consult KILGORE'S LAWN DUST label.

1 lb. 20c; 25 lbs. \$4.70
50 lbs. \$8.40

KILGORE'S NEUTRITE SPRAY

A wettable powder supplying nutritional elements essential to the normal growth of certain plants. Use at the rate of three tablespoons per gallon, or four pounds per 50 gallons of water.

1 lb. 18c; 25 lbs. \$4.15; 50 lbs. \$7.25

KILGORE'S POISON BAIT NO. 8 (Code No. B-8) (contains chlordane)

For the control of mole crickets and cutworms. Apply by broadcasting bait generously over ground in infested areas around shrubs and other plants. This bait can be broadcast over foliage also for the control of climbing cutworms

1 lb. 10c; 25 lbs. \$2.40; 50 lbs. \$3.75

KILGORE'S POISON BAIT NO. 11 (Code No. B-11)

(contains toxaphene and chlordane)

This bait is somewhat more specific against cutworms, also controls mole crickets and can be used to advantage where climbing cutworms are not a factor. Apply by broadcasting bait generously over ground in infested areas around shrubs and other plants. Do not throw this bait directly into plants as some damage might result.

1 lb. 12c; 25 lbs. \$2.70;
50 lbs. \$4.40

KILGORE'S ROSE DUST AND GUN

A combined insecticide and fungicide for checking insects and diseases on roses. This dust should be applied once or twice at intervals of approximately seven days. Gun complete with dust 75c. Refills for dust guns (dust only) 30c lb.

KILGORE'S SHRUB DUST

An entirely new, safe and extremely effective material for the control of a wide variety of insects on shrubs and other ornamentals as indicated in the preceding table. KILGORE'S SHRUB DUST kills aphids, thrips, practically all types of caterpillars, including leaf-tiers, grasshoppers, as well as many other chewing and sucking types of insects. It is not effective against scale insects, mealy bugs, white flies and red spiders. As KILGORE'S SHRUB DUST is much less toxic to human beings and warm blooded animals as compared with most insecticides now in general use, we recommend this dust very highly not only for its effectiveness but for its safety factor. Dust gun complete with dust 75c. Refill for dust guns (dust only) 30c lb.

cides now in general use, we recommend this dust very highly not only for its effectiveness but for its safety factor. Dust gun complete with dust 75c. Refill for dust guns (dust only) 30c lb.

NO NIB'L RABBIT REPELLENT

NO NIB'L is recommended as a rabbit repellent for flowers, shrubs and other ornamentals. NO NIB'L when used as directed will not harm plants or soil and is non-injurious to birds, rabbits and other animals. It is easy to use and is effective either as a dust or as a spray.

6 oz. shaker-top can 98c

ORTHOL GARDEN SPRAY

A modernized oil emulsion containing nicotine and DDT for the combined control of aphids, thrips, red spiders, mealy bugs and many other garden insects. Use at the rate of six tablespoons per gallon of water.

4 oz. 35c; 16 oz. 75c; 31 oz. \$1.25

RED ARROW INSECT SPRAY

A safe, all around spray. Kills aphids, thrips, leafhoppers, caterpillars, red spiders and many other garden insects. Use at the rate of two teaspoons per gallon of water.

1 oz. 35c; 4 oz. \$1.00; 1 pt. \$2.85;
1 qt. \$5.00

SOILFUME CAPS (ethylene dibromide)

The use of these capsules for nematode control (root-knot), offers an extremely convenient and easy method for soil fumigation in small areas. Capsules are placed in the soil six to seven inches deep and twelve inches apart. Seed or plants should not be put in under two weeks after treatment. Areas immediately adjacent to other plants or grasses should not be treated.

100 capsules \$2.00; 200 capsules \$3.25

VAPOTONE XX SPRAY (TEPP)

For control of aphids, thrips and red spiders. This material is very toxic and all labelling instructions should be complied with. Use two teaspoons per gallon or ½ pint per 50 gallons of water.

4-oz. bottle \$1.00;
16-oz. bottle \$2.75

VOLCK OIL SPRAY

Especially designed for the control of scale insects, mealy bugs, red spiders and white flies on garden shrubs, palms and other ornamentals. Do not use this spray on coconuts, palms, maiden-hair fern, and other sensitive plants.

4 oz. 35c; 16 oz. 70c;
31 oz. \$1.25; 1 gallon \$2.85

The Insecticides and fungicides listed on this page are recommended for use on flowers, shrubs and lawns. We also carry a complete line of insecticides and fungicides for vegetable gardens and commercial agricultural uses, and also insecticides to

control household pests. See Kilgore's Fall Planting Guide or Kilgore's large annual catalog for complete listing and information, or write The Kilgore Seed Company, Plant City, Florida.

FERTILIZER, LAWN AND GARDEN SUPPLIES

Postpaid unless otherwise specified. Prices subject to change without notice.

HY-GRO—Soluble Plant Food

An excellent starter solution for potted plants, seedbeds and transplanting. Use at the rate of 3 tablespoons dissolved in 2 gallons of water (1 teaspoon in 1 quart of water).

3 oz. 30c; 1 lb. \$1.00; 2 lbs. \$1.25; 10 lbs. \$5.25
F.O.B. Plant City

HYPONEX—A Good Starter Solution

Especially valuable in seedbeds and to start plants off after transplanting. Comes in a powder which makes liquid plant food containing all plant food elements plus Vitamin B₁. Dilute 1 oz. to 6 gallons of water.

1 oz. 10c; 3 oz. 25c; 7 oz. 50c; 1 lb. \$1.00;
10 lbs. \$8.00
F.O.B. Plant City

PLANTABBS FOR HOUSE PLANTS

Plantabbs are a complete, balanced plant food of the high analysis 11-15-20. Use Plantabbs for all indoor potted plants and flowers, window and balcony boxes. Plantabbs are also excellent for garden flowers and vegetables. Plantabbs with Vitamin B₁ make vastly stronger root growth.

10 Tablets 10c; 30, 25c; 75, 50c; 200, \$1.00; 1,000, \$3.50

VHPF "VIP"

VHPF is an instantly soluble fertilizer—containing the three major plant food elements, Nitrogen, Phosphoric Acid and Potash plus trace elements of Manganese, Magnesium, Copper, Sulphur, Boron, Zinc and Molybdenum. Used as a starter solution, a nutritional spray and side dresser. Compatible with insecticidal and fungicidal sprays. Use 1 tablespoonful per gal., 1 lb. to 20 gals. and 6 lbs. per 100 gals. water.

1-lb. can 50c; 3-lb. bag 75c; 50-lb. bag \$11.50
F.O.B. Plant City

CAMELLIA AND AZALEA PLANT FOOD

A special prepared fertilizer for camellias and azaleas. Containing the three primary plant foods, plus secondary elements.

5 lbs. 58c; 10 lbs. \$1.05; 25 lbs. \$1.90; 100 lbs. \$5.75.
(F.O.B. Plant City)

VERTAGREEN

VERTAGREEN (formerly Velvetgreen) is a high quality, scientifically blended plant food, for lawns, flowers, shrubs, trees, vegetables. Contains nitrogen, phosphorous and potash, besides several other important plant food elements. Clean, odorless, easy to apply. Used with outstanding success by thousands.

Price per lb. 15c; 5 lbs. 55c; 10 lbs. 95c; 25 lbs. \$1.70
100 lbs. \$4.55, F.O.B. Plant City

VIGORO (F.O.B. Plant City)

A complete plant food, supplies 11 vital food elements.

1 lb. 15c; 5 lbs. 53c; 10 lbs. 95c;
25 lbs. \$1.70; 50 lbs. \$2.80;
100 lbs. to 400 lbs. @ \$4.55 cwt.

Write for prices on larger quantities.

ES-MIN-EL contains many essential mineral elements in proper proportions. Add to ordinary fertilizers at rate of 1 lb. or 2 lbs. to 10 lbs. regular fertilizer or 100 to 200 lbs. per ton of regular fertilizer.

5-lb. bag \$1.00; 100-lb. bag \$10.00; Ton \$190.00,
F.O.B. Plant City

WIZARD BRAND SHEEP MANURE

5 lbs. 35c; 10 lbs. 60c; 25 lbs. \$1.00; 50 lbs. \$1.70; Ton \$64.25
Prices quoted are F.O.B. Plant City

PEAT MOSS

Good to add humus and hold moisture in seedbeds. Also an excellent poultry litter.

Georgia Peat Humus, 1½ cu. ft. bag \$1.20 each
In Crates 4 cu. ft. of compressed Moss each \$3.50

European Peat. Compressed in burlap wrapped bales 20" x 20" x 36" each \$4.50; Bulk - 8c per lb.
F.O.B. Plant City

SPHAGNUM MOSS

Burlap Wrapped Bales 14" x 16" x 45" each \$4.00
Bulk - 30c per lb.
F.O.B. Plant City

Garden Size, for Garden Peas, Sweet Peas, All Beans, Soy Beans and Lupines.

Each package will inoculate 6 lbs. seed—15c.

TERRA-LITE (Vermiculite)

An excellent light weight medium for starting cuttings, seed in flats, paper pots or plant bands. Can be mixed with soil in seedbeds. Increases germination, eliminates damping off. Holds moisture for several days without rewetting.

4-qt. bag 39c; ½-bu. bag 89c; 2-bu. bag \$1.75; 4-cu. ft. bag \$2.25, F.O.B. Plant City

Write for complete descriptive pamphlet on Terra-Lite.

HORMODIN POWDERS (Prepaid)

"Hormodin" is a hormone-like plant growth substance. Its principal use is to stimulate rapid root growth on cuttings.

No. 1—For Chrysanthemums, Poinsettias, Roses, Etc.

¼ oz. 25c; 1¼ oz. 50c; 1 lb. \$3.00

No. 2—For semi-woody plants and most common shrubs.

1¼ oz. 75c; 1 lb. \$4.50

No. 3—For resistant species, such as Evergreens and dormant cuttings.

1 oz. \$1.00; ½ lb. \$4.50

Combination Package, powders Nos. 1, 2 and 3, in carton, 75c

ROOTONE

A hormone powder to hasten the rooting of cuttings

It is the easy, economical, safe and sure treatment for rooting cuttings. Low cost—1/30 to 1/50 cent per cutting.

Write for booklet "Rootone—A hormone powder." Complete directions given on each package.

¼-oz. pkg. 25c; 2-oz. pkg. will treat up to 3,000 cuttings, \$1.00;
Commercial pkg., 1 lb., will treat up to 30,000 cuttings, \$5.00
(Patents Pending)

TRANSPLANTONE

Transplantone supplies the plant with chemicals which stimulate root formation and growth after transplanting time. ½ oz. makes five gallons solution.

½ oz. 25c; 3-oz. can \$1.00; 1-lb. can \$4.00

AIRWRAP

A special plastic adapted to grove and plant propagation.

½-lb. Roll, 53 Wraps 6 x 8 in. \$1.10
1-lb. Rolls, 107 Wraps 6 x 8 in. 1.75

GREEN THUMB ROOTING KIT

For plant propagation. Kit contains sphagnum moss, rooting hormone with brush and plastic tying strips. Complete instructions in box.
